

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): A curable composition comprising:

(A) particles prepared by bonding oxide particles of at least one element selected from the group consisting of silicon, aluminum, zirconium, titanium, zinc, germanium, indium, tin, antimony, and cerium with an organic compound having a polymerizable unsaturated group (~~hereinafter referred to as “component (A)”~~),

(B) a compound having a urethane bond and two or more polymerizable unsaturated groups in the molecule (~~hereinafter referred to as “component (B)”~~), and

(C) a photoinitiator.

Claim 2 (Currently Amended): The curable composition according to claim 1, ~~further~~ also comprising (D) a compound having two or more polymerizable unsaturated groups in the molecule other than ~~[[the]]~~ component (B).

Claim 3 (Currently Amended): The curable composition according to claim 1 ~~or 2~~, wherein the organic compound having a polymerizable unsaturated group in ~~[[the]]~~ component (A) ~~further~~ additionally comprises a group shown by ~~the following~~ formula (1),

wherein U represents NH, O (~~oxygen atom~~), or S (~~sulfur atom~~), and V represents O or S.

Claim 4 (Currently Amended): The curable composition according to ~~any of claims~~ claim 1 to 3, wherein the oxide particles of said component (A) are antimony-doped tin oxide particles.

Claim 5 (Currently Amended): A cured product obtained by curing the curable composition according to ~~any of claims~~ claim 1 to 4.

Claim 6 (Currently Amended): A laminate comprising a ~~cured~~ film of the cured product according to claim 5.

Claim 7 (Currently Amended): The laminate according to claim 6, wherein said ~~cured~~ film has a high refractive index.

Claim 8 (Currently Amended): The laminate according to claim 6 ~~or 7~~, wherein said laminate ~~further~~ also comprises a low-refractive-index film having a refractive index of 1.38 – 1.45.

Claim 9 (Currently Amended): The laminate according to ~~any of claims~~ claim 6 to 8, wherein said laminate ~~further~~ also comprises a substrate.

Claim 10 (Currently Amended): The laminate according to claim 8 ~~or 9~~, wherein said laminate ~~further~~ additionally comprises another film located between the cured film having high refractive index and the film having a refractive index of 1.38-1.45.

Claim 11 (Original): The laminate according to claim 6, wherein said laminate has a cross-cut peeling value from 70/100 to 100/100.

Claim 12 (Original): The laminate according to claim 11, wherein said laminate has a surface resistivity of $1.5 \times 10^9 \Omega/\text{square}$ or higher.

Claim 13 (Canceled).

Claim 14 (Original): The laminate according to claim 11, wherein said cure product has a haze value of 0.22 or higher.

Claim 15 (Currently Amended): ~~The use of~~ A method of using the laminate according to ~~any of claims~~ claim 6 to 14 as a laminate having antireflection and antistatic properties.
